

Yextreme Technologies

Precision Engineered... Performance Delivered...

An extreme innovation in design and development of dies moulds and products

ABOUT US

Founded in 2013, Yextreme Technologies is a professionally managed MSME-certified manufacturing company delivering high-precision engineering solutions across multiple critical industries.

With a strong focus on quality, accuracy, and reliability, we support customers from concept to production.

- Established: 2013
- Certification: ISO 9001:2015
- Category: MSME Registered

Our Competitive Advantages

- Skilled technical team
- Advanced CNC infrastructure
- Complete Moulding Solutions
- Strong quality focus
- Custom solutions for complex parts
- Reliable and responsive service

Our Core Expertise

- High Precision Machined Components
- Precision Moulds & Tooling Solutions
- Virgin Quality Prime Grade Polymer / Plastic Components

HIGH PRECISION MACHINED COMPONENTS

We specialize in the manufacture of high precision machined components using advanced CNC machining technology and proven engineering practices. Our components are produced with tight tolerances, superior surface finish, and consistent quality, meeting the exacting requirements of critical industrial application.

Core Capabilities

- CNC Turning & Milling
- Multi-axis Machining
- Close-tolerance Machining
- Prototype to Batch Production
- Complex Profile Machining

Key Features

- High dimensional accuracy
- Tight tolerances as per drawing specifications
- Excellent surface finish
- Repeatable quality across batches
- Suitable for critical applications
- Inspection at every stage of production

Materials Machined

Aluminium Alloys Brass, Copper & Bronze / Stainless Steel (SS 304 / 316 / 410)/ Carbon & Alloy Steels/ Engineering Plastics (Nylon, Delrin, PTFE, etc.)/Super duplex steel/Titanium alloys/Inconel, Monel etc.

PRECISION MOULDS & TOOLING SOLUTIONS

We design and manufacture high-precision moulds engineered for consistent performance, long tool life, and repeatable part quality. Our moulds are developed using advanced design practices and precision machining to meet the stringent requirements of modern manufacturing industries. Our tooling solutions are engineered to deliver dimensional accuracy, repeatability, and long service life, even under demanding production conditions.

Our Capabilities

- Plastic Injection Moulds INCLUDING HOT RUNNER MOULDS
- Multi-Cavity & Single-Cavity Moulds
- Prototype & Production Moulds
- High-Precision & Close-Tolerance Tooling
- Custom Mould Design & Development
- Injection Moulded Part Production

MODULAR STACKABLE STORAGE BINS

Optimized Storage Solutions for Industrial Excellence

Our Modular Stackable Storage Bins are engineered to meet the demanding requirements of modern industrial storage. Designed for systematic stacking, maximum storage efficiency, easy identification, and long-term durability, these bins are ideal for organized storage of parts, assemblies, tools, spares, and finished goods and materials across various industries to help streamline operations and improve workplace productivity. .

Design Highlights

- Robust structure with reinforced side walls
- Precision-designed stacking ribs for stable vertical stacking and Space Optimization
- Front-open access for quick material picking
- Uniform dimensions for seamless rack compatibility
- High Load-Bearing Capacity
- Smooth Inner Surface for Easy Cleaning
- Compatible with Racks & Shelving
- Provision for Label Holder / ID Tag
- Non-Toxic, Industrial-Grade Material

Material & Build

- Material: High-Quality Plastic -PPCP
- Finish: Smooth Finish
- Color Options: Blue, Red, Grey, Green, Yellow
(custom colors on request)

Available Sizes

Size Code	Length (cm)	Width (cm)	Height (cm)
DINO 125	17.5	12.5	10.0
DINO 150	22.5	15.0	12.4
DINO 200	30.0	20.0	12.6

Application Areas

- Manufacturing Units
- Automobile & Auto Component Industry
- Engineering & Fabrication Units
- Electrical & Electronics Industry
- Warehouses & Logistics Centers
- Tool Rooms & Maintenance Stores

One System — Different Bin Stacking Methods

- Lateral Interlock Stacking
- RackFit Storage System
- Top-Load Vertical Stacking
- Vertical Interlocking Multi-Tier Storage

PHARMACY MEDICAL STORAGE BINS

Our Pharmacy Medical Storage Bins are specially designed for systematic storage and quick dispensing of medicines in hospital pharmacies, nursing stations, and medical stores. The bins ensure hygiene, clear identification, and easy access, supporting efficient pharmacy operations and patient safety.

Pharmacy-Oriented Features

- Medical-grade, non-toxic plastic
- Smooth inner surface for easy cleaning
- Front-open design for quick medicine picking
- Compatible with steel pharmacy racks
- Lightweight and easy to handle

Material & Build

- Material: Medical-Grade PPCP / ABS
- Finish: Smooth Finish
- Standard Colors: Blue and Grey

Size Options

Model	Dimensions (L×W×H) cm
PMB-01	31.5 × 10.0 × 11.0
PMB-02	31.5 × 15.0 × 11.0
PMB-03	31.5 × 22.0 × 11.0

Application Areas

- Hospital Pharmacies
- Medical Stores & Drug Dispensaries
- Nursing Stations & Wards
- Emergency & ICU Drug Storage
- Central Medical Stores

ROUND PLASTIC CONTAINERS WITH COLOUR CAPS

Injection Moulded for Perfect Shape, Smooth Finish & Easy Labeling (100 ml / 200 ml / 300 ml with different colour caps)

Our 100 ml, 200 ml, and 300 ml round plastic containers are manufactured using high-precision injection moulding, delivering accurate geometry, smooth surface finish, and uniform wall thickness. These containers are specifically designed to support clean stickering, branding, and professional presentation, making them ideal for pharmaceutical, medical, cosmetic, Pet Feed Packaging and laboratory applications, especially where clean appearance and reliable labeling are essential..

Product Highlights

- Available in 100 ml / 200 ml / 300 ml capacities
- Injection moulded construction for correct shape & consistency
- Smooth, sink-free outer surface – ideal for labels & stickers
- Round, balanced profile for easy handling and shelf stability
- Multiple cap colour options for product identification

Material & Build

- Material: High-Quality Plastic -PPCP
- Finish: Smooth Finish
- Standard Colors: Blue and Geen,red,golden,violet etc.
- Size Options

Model	Dimensions (DIA×H) cm
100 ml	DIAMETER 4.6 X 7.8
200 ml	DIAMETER 5.5 X 10.5
300 ml	DIAMETER 6.0 X 12.7

Application Areas

- Pharmaceutical & Hospital Products
- Cosmetic & Personal Care Products
- Laboratory & Chemical Packaging
- Ayurvedic & Nutraceutical Products
- Pet & Animal Feed Products

INFRASTRUCTURE

MANUFACTURING FACILITIES

STATE-OF-THE-ART MANUFACTURING & INSPECTION FACILITIES

CNC Machining Division

VMC Milling Machines

- STM – VL 1050N
- STM – VL 850 (with Detron 4th Axis)

CNC Turning Centres

- Jyoti CNC Automation Ltd – DX 200 5A
- Jyoti CNC Automation Ltd – DX 200 3

EDM (Sparking) Machine

- Electronica – 5530 E Series (35A)

Conventional Machining

- DRO Milling Machines (M1TR) – 2 Nos
- Lathe Machines – 3 Nos
- Radial Drilling Machine – 1½ inch
- Surface Grinding Machine 2 Nos
- Band Saw Machine
- Tapping Machine – M4 to M12
- Welding Machine

Quality Control Division

- Height Master

Make: Tesa | Model: Tesa Micro
Height 600-2D

- Digital Micrometer (0–25 mm)

Make: Mitutoyo

- Digital Vernier Caliper (0–200 mm)

Make: Mitutoyo

- Analog Vernier Caliper (0–1000 mm)

- End Mill Grinding Machine(DIA 4-13)

Make: Vertex

- Drill Bit Grinding Machine(DIA 3-13)

Make: Vertex

- Screw Compressor 7.5 HP

Industries Served

- Automotive & Auto Components
- Aerospace & Defence
- Medical Devices & Equipment
- Industrial Machinery
- Electrical & Electronics
- Oil & Gas / Energy
- Consumer & Industrial Products
- Packaging and FMCG

Value We Deliver

- Consistent quality & on-time delivery
- Engineering support from concept to production
- Cost-effective machining solutions
- Scalable production capability
- Long-term supplier partnership

VIRGIN QUALITY PRIME GRADE POLYMER PLASTIC COMPONENTS
