

HIGH PRECISION MACHINED COMPONENTS

We specialize in the manufacture of high precision machined components using advanced CNC machining technology and proven engineering practices. Our components are produced with tight tolerances, superior surface finish, and consistent quality, meeting the exacting requirements of critical industrial application.

Core Capabilities

- CNC Turning & Milling
- Multi-axis Machining
- Close-tolerance Machining
- Prototype to Batch Production
- Complex Profile Machining

Key Features

- High dimensional accuracy
- Tight tolerances as per drawing specifications
- Excellent surface finish
- Repeatable quality across batches
- Suitable for critical applications
- Inspection at every stage of production

Materials Machined

Aluminium Alloys Brass, Copper & Bronze / Stainless Steel (SS 304 / 316 / 410)/ Carbon & Alloy Steels/ Engineering Plastics (Nylon, Delrin, PTFE, etc.)/Super duplex steel/Titanium alloys/Inconel, Monel etc.
